bet365, the world's leading online betting and gaming company, is a driving force in the development of enterprise and Internet technology. Delivering an unrivalled online experience to more than 80 million customers in 21 languages. As a bet365 Graduate you'll join a driven and supportive team who are passionate about our brand, product, customers and employees. Using the latest technologies you'll be tackling some of businesses greatest challenges and joining us as we continue to break new ground in innovation and ever evolve our customer experience. In this fast paced environment there are few boundaries and you'll be taking the first steps to building a strong career. With Graduate roles in Technology, Marketing, Finance and Operations there really is something for everyone.

At Cadent, we are excited to be part of the future of UK energy! One thing we know for sure – when we combine our brand with the talent of Cadent employees, we create something special. We have a clear roadmap that will both drive our performance to the forefront of our industry and support the UK government in achieving their net zero target by 2050. Share our passion for keeping the energy flowing and play a vital role in shaping the future of the UK's largest gas network. By joining us through our Future Talent Initiatives, you will have an impact on our business from day one! Your placements will professionally and personally challenge you and help you to build the skills and experience you will need to emerge at the top of your profession. You will also experience a variety of comprehensive and challenging training modules, ranging from hands on technical training to personal development skills. Throughout this, you will be supported every step of the way by our Future Talent Team, a dedicated mentor and by the colleagues within your teams. At the end of the programme, you will have the opportunity to move into a full-time role within our business. From here, there will be no limit to how far you can develop and progress your career at Cadent. We believe in developing and investing in our people. We know that by supporting our future leaders and engineers to gain the very best skills, behaviours and experience around, we'll continue to have a bright, successful future and you will too. As long as you have the relevant skills and desire to learn, together with plenty of enthusiasm, curiosity and bags of motivation, you'll go far on one of our Future Talent Programmes.

Cadent  
Your Gas Network

CATERPILLAR®

With 2022 sales and revenues of \$59.4 billion, Caterpillar Inc. is the world's leading manufacturer of construction and mining equipment, off-highway diesel and natural gas engines, industrial gas turbines and diesel-electric locomotives. For nearly 100 years, we've been helping customers build a better, more sustainable world and are committed and contributing to a reduced-carbon future. Our innovative products and services, backed by our global dealer network, provide exceptional value that helps customers succeed.

# COMPUTING & ENGINEERING FAIR

We supply asset management software to a range of organisations across a variety of different sectors. Whether it's warehouse stock management, the emergency services, or museums, the media, and the arts – we provide fully-configured software solutions for our clients. Our flagship program, Pro-Cloud, is used by clients such as St John Ambulance, the V&A Museum, and even the BBC. With over 26 years' experience delivering powerful software solutions to a litany of different groups from SMEs to large national companies, at CSS Europe Ltd we strive for excellence in our products, services, and our expansive team.

EffecTech needs analytical scientists and calibration engineers, to support the continued growth of our business in the UK and internationally. We are primarily looking for individuals with a professional/academic achievement in chemistry or a related physical science at BSc level. Knowledge and experience of gas chromatography would be would be advantageous, however a genuine interest in mathematics and science is more important. EffecTech is a global leader in gas measurement with laboratory facilities in the UK. Supporting the bridge to an economy based upon 100% renewable energy, EffecTech plays a key role in the global measurement system ensuring traceability and accuracy of the analysis of transition fuels. We train our staff to be world experts in a wide range of gas measurement instrumentation. EffecTech is a sister company of BOC, the largest supplier of industrial, medical and special gases in the UK and Ireland. Both EffecTech and BOC are part of the Linde Group, a leading global industrial gases and engineering company.

One brand, many companies, and many, many people – that's us in a nutshell. Spread all over the world, we have a passion for home furnishing and an inspiring shared vision: to create a better everyday life for the many people. This, together with our straightforward business idea, shared values, and a culture based on the spirit of togetherness, guides us in everything we do.

What we offer: Information Technology Internship Programme 2024

As a digital intern you will join the UK and Ireland Digital team, who ensure IKEA Digital products and platforms are delivered with excellence to meet customer needs across our market and enhance the whole IKEA shopping experience. The internship programme is structured to give you the chance to make an impact across a wide range of digital domains, from Product Development through to Project Delivery, as well as Information Security and Service Operations. You will have buddies and mentors who will make sure you feel included and onboard you to your projects with the ambition to make you as any other member of the team. From day one, you will be working on projects that matter, whilst getting the guidance and development to help you discover your potential. Of course, we will arrange a lot of fun internship activities to help you learn more about the IKEA business, ways of working, our very important culture and even FIKA! Take the chance to join a loved worldwide brand, learn more about our digital agenda and discover our endless career opportunities.

JCB is a company focused on the future. We are always innovating, pushing boundaries and setting the standard. We can do this because our people share vision, enthusiasm and the drive to get things done. We're one of the largest manufacturers of construction equipment in the world. We design, develop, manufacture and assemble more than 300 different products over four continents. This means we can offer a variety of experience for anyone on our Early Careers schemes that you simply won't find anywhere else.

## NEXT

AIR AND SPACE POWER TO PROTECT OUR NATION: For over a hundred years the Royal Air Force has defended the skies of Britain and projected Britain's power and influence around the world. We work with our UK and international partners to watch the skies, respond to threats, prevent conflict, and provide assistance in an uncertain world.

# COMPUTING & ENGINEERING FAIR

Siemens Gamesa brings together a team of over 27,000 passionate employees of close to 100 nationalities working in more than 90 countries around the world. With a worldwide installed capacity of 124.5 GW, its end-to-end value chain presence encompasses onshore and offshore wind turbines design, manufacturing, installation as well as cutting-edge service solutions. Programme Summary: The SGRE UK&I R&D Engineering Graduate Programme is targeted at sourcing recruits from a variety of pathways and developing them over a two-year period to be able to fulfil professional roles available within the organization. Most roles within the UK&I R&D team require academic qualifications in the discipline of Electrical and Electronic Engineering, Mechanical, Control or Software Engineering

Sparta Global is a leading technology training provider and consultancy firm that gives individuals with a passion for technology, access to fully funded industry leading and award-winning training in specialist areas that are in demand. These include; Software Development, DevOps, Software Testing, Data Engineering and Analysis.

Over period of 5-8 weeks, we equip you with the exceptional technical and business skills you need to power short and long-term digital projects, and support you with onsite development and progression opportunities, towards your journey to becoming a credible and professional consultant in your field. At the completion of your Academy course, you will officially become a 'Spartan' and will be assigned to work on projects with Sparta Global clients across the UK, including: the Home Office, ASOS, Three Mobile, Direct Line Group, RBS and many more. You will work for us as a consultant over two years, honing your skills and experience making yourself highly employable and ready for the next stage of your career. Tech is everywhere, It's the future. We are looking for enthusiastic individuals who are keen to learn and develop themselves to make an impact in this space. Kickstart your lucrative and rewarding career in technology today!

The Staffordshire Jobs & Careers team will support residents, employers, schools, colleges, and other partners to develop opportunities for not only paid employment but further support, mentoring, and training to encourage people to apply for paid vacancies, and to develop younger individuals into building a career.

As a Staffordshire University student, you have a chance to study and work abroad during your time studying with us. Participating in study or work experience abroad will support you in gaining new skills, developing transversal skills and enhancing your employability. You will be able to make new friends and enhance your intercultural awareness. SU Global Connections are here to support you through this journey.

Synectics Solutions works with data, and lots of it. 1/3 billion records to be precise. That data is used as a force for good by partnering with public and private sector organisations to build data sharing syndicates that provide meaningful insights and help contributors solve common problems around organised financial crime, money laundering, customer identification and financial inclusion. Very few organisations can combine data and advanced technology in the way that we do which is why we're trusted by a range of tier one banks, insurance companies and the likes of the Cabinet Office. With 30 years under our belt, we've helped to identify and save organisations over £5 billion that could otherwise have been lost to error, fraud or wider financial crime.

The Wrekin Housing Group is a socially minded organisation that prides itself on making a difference to people's lives, we do this by:

- Providing over 13,000 homes for affordable rent and low-cost home ownership across Shropshire, Staffordshire and Telford & Wrekin.
- Delivering innovative care solutions ranging from domiciliary care for the elderly to supported housing and care for adults with learning difficulties, as well as dementia nursing care.
- Channelling social investment to create jobs and promote economic growth, generating opportunities for people to gain employability skills, maximising the social value of our services and delivering wider community benefits
